

Harness Electric Power from the Sun

Learn the Basics of Solar Installation

Solar Photovoltaic (PV) Technology Training Course

Overview

Solar Photovoltaic (PV) Technology Entry-Level Training Includes:

- NABCEP entry-level Certificate of Knowledge exam (optional)
- PV history and market developments
- Solar concepts and terminology
- Onsite PV system configurations and components
- PV Safety

Who Should Attend:

Any person or business interested in learning the basics of Solar Photovoltaic (PV) Technology.

Pre-Qualification

All participants must take the Career Readiness Exam (CRC) and achieve a Gold Certificate. The CRC can be taken at any career center in the state. Please see www.state.tn.us/labor-wfd/cc/ for a career center near you.

Cost

There is NO COST to attend the 6-day Solar PV Technology training course. Lunch is provided. Accommodations are NOT provided.
